EXAMPLE QUANTITIES / DIMENSIONS BEFORE BENDING ADJUSTMENTS

Refer to beam and column studies for drawing-reference context.

SHAPE DIMENSION CONVENTION

READ THE SCHEDULE

MARK links the bar to a drawing.
DIA. is the example bar diameter in mm.
QTY is an illustrative count.
A and B describe the sketch dimensions.
REV identifies the example revision.

DRAWING NOTES

Dimensions and quantities are examples.
Bending allowances are not calculated.
Shape sketches are not fabrication details.
No steel order may be based on this sheet.
